SELF-PACED CURRICULUM

FOR HOMESCHOOL FAMILIES

joinraile.ai/homeschool

Get your kids AI-ready.

Your kids are going to use AI, with or without a plan. Without one, they trust answers that sound sure, share things they shouldn't, and let a chatbot do the thinking. **And nobody handed you a playbook.**

We get it. AI moved faster than anyone planned for. Led by a parent and award-winning Villanova data science educator, we built an AI literacy curriculum your child works through on their own, with RAILE Chat, a chatbot built for kids, and RAILE Learn, a game that practices each lesson. You don't teach the lessons, and you don't need to know anything about AI. We never train on your child's chats or sell data, and we are COPPA compliant.

BUILT FOR

Grades 6 to 8. Your child works alone, at your family's pace.

RECOGNIZED BY

Pennovation Accelerator winner; **KidsFirstAI** first cohort

SAFETY BENCHMARK

RAILE Chat scored **91.8% on KORA**, the open benchmark for AI with kids. Self-run, results published.

THE PLAN

1 SET IT UP

Print and set up, once

Print the Student Guide, then set up RAILE Chat in four steps. Your child gets a login code.

2 HAND IT OVER

16 sessions, on their own

About 30 minutes each: 20 in the Student Guide with RAILE Chat, then 10 in RAILE Learn.

3 CHECK IN

Eight short conversations

One at the end of each lesson. The Parent Guide tells you what to look at and what to say.

A Quick Check at the start, the midpoint and the end shows what your child learned. You see the results.

WHAT SUCCESS LOOKS LIKE

You

- **Nothing to teach:** the Student Guide is written to your child, with answers at the back.
- **Know what to say:** questions to ask after each lesson, and one thing to push back on.
- **See what they're doing:** every chat by title, a weekly email, and an alert if a concerning topic comes up.
- **Family AI rules, decided** by you, before the lesson on when to use AI.

Your child

- **Knows how AI works:** it predicts the next word, so it can sound sure and still be wrong.
- **Spots where AI goes wrong,** and checks before trusting anything that matters.
- **Gets what they want from AI:** Ask, Add, Adjust, and still check it.
- **Knows when to use AI and when not to,** by your family's rules.
- **Catches what a chatbot assumed,** and checks its claims somewhere that isn't the chatbot.
- **Follows a Code of their own:** five rules that say when, what and why.

Don't leave them to figure it out alone.

A kid who questions AI, and a parent who knows what to say.

what's covered on back →

RAILE
R(ai)sing Literate Explorers

SELF-PACED CURRICULUM · WHAT'S COVERED

Here's what's covered.

Nine lessons in 16 sessions. Your child takes them in number order, looping twice through three words.

Curious

LESSONS 1, 2, 6

How AI works.

LESSON 1 · SESSION 1
Fun with AI
Your prompt shapes the answer. Change one word and you get a different one.

LESSON 2 · SESSIONS 2, 3
What Comes Next?
A chatbot writes by predicting the most likely next word, one word at a time.

LESSON 6 · SESSIONS 9, 10
How Machines Learn
A machine learns from examples, and only from examples.

Cautious

LESSONS 3, 7, 8

Where it goes wrong.

LESSON 3 · SESSIONS 4, 5
How AI Goes Wrong
A chatbot predicts what an answer looks like but doesn't check it, so we check before we trust.

LESSON 7 · SESSIONS 11, 12
What Did It Assume?
When you leave a detail out, a chatbot picks it for you.

LESSON 8 · SESSIONS 13, 14
Check the Claim
An answer is a bundle of claims. Check the ones that matter.

Capable

LESSONS 4, 5, 9

How to use it well.

LESSON 4 · SESSIONS 6, 7
Getting What You Want from AI
Better words, better predictions: Ask, Add, Adjust, and still check it.

LESSON 5 · SESSION 8
When to Use AI
AI is a tool: use it to help you think, not to think for you.

LESSON 9 · SESSIONS 15, 16
My AI Code
A good rule says when, what you will do, and why.

EVERY SESSION, ABOUT 30 MINUTES

READ
One big idea
Explained to your child in plain words, with new words defined.

DO
Try it in RAILE Chat
Your child tries it in the chatbot and writes down what happens.

CHECK
Guess, then check
Answers sit at the back, never under the question.

FINISH
Play RAILE Learn
10 minutes of the game, or one of the three Quick Checks.

WHAT YOUR FAMILY GETS

The Student Guide
All 16 sessions in one book. Print it, or read it on screen and write in a notebook.

The Parent Guide
Setup, what to expect, and what to look at and say after each lesson.

RAILE Chat
A chatbot built for kids, with a parent dashboard, chat summaries and alerts.

RAILE Learn
A game with four worlds that practices what the lessons teach.

Three Quick Checks
Online, with results in your dashboard, so you can see what changed.

A Code and a certificate
Five rules your child wrote, on a card for the fridge, and a certificate you sign.

What you need

- A laptop, Chromebook or tablet with a web browser
- A printer, or a notebook for your child's answers
- About 30 minutes a session, at your family's pace
- One short conversation at the end of each lesson

Get the curriculum.
