RAILE READY
FOR SCHOOLS
joinraile.ai/classroom

Get your students AI-ready.

Your students are already using AI, mostly without guidance. They trust answers that sound sure, share things they shouldn't, and blur the line between help and cheating. **And most teachers were never trained to guide them.**

We get it. AI moved faster than anyone planned for. Led by a parent and award-winning Villanova data science educator, we train your teachers, give them a four-week classroom curriculum, and give every student RAILE Chat, a chatbot built for kids, and RAILE Learn. We never train on student chats or sell data, and we are COPPA compliant.

IN SCHOOLS	RECOGNIZED BY	SAFETY BENCHMARK
Piloting at **Ss. Colman-John Neumann**	**Pennovation Accelerator** winner; **KidsFirstAI** first cohort	RAILE Chat scored **91.8% on KORA**, the open benchmark for AI with kids. Self-run, results published.

THE PLAN

1 PLAN IT

We plan it with you

Pick dates for the teacher session and the four lessons. We set up Chat and Learn from your rosters.

2 TRAIN YOUR TEACHERS

A 90-minute teacher session

In person or virtual. Your teachers leave ready to teach the curriculum and run Chat.

3 TEACH YOUR STUDENTS

Four lessons in four weeks

One 45-minute lesson a week. Students use RAILE Chat and RAILE Learn from the first lesson.

A short eval in the first and last lessons shows what your students learned. You get the results.

WHAT SUCCESS LOOKS LIKE

Your teachers

- **Ready to teach:** four lessons with slides, scripts and worksheets.
- **Chat, ready to run:** rosters loaded, login codes printed, dashboard and alerts set up.
- **An AI activity, planned** for a lesson they teach the following week.
- **A plan for when it goes wrong:** what to do in the first hour.

Your students

- **Know how AI works:** it predicts the next word, so it can sound sure and still be wrong.
- **Spot where AI goes wrong,** and check it before trusting anything that matters.
- **Get what they want from AI** with clear prompts, changed until the answer is right.
- **Know when to use AI and when not to,** at the level their teacher sets.
- **Follow the three rules:** school-friendly, personal information private, no pictures of real people.
- **Speak up** when something feels off.

Don't leave them to figure it out alone.

A school that questions AI, and teachers who know what to do when it matters.

what's covered on back →

Here's what's covered.

Teachers go first, so they are ready to teach the curriculum and answer questions.

Teacher session

90 MINUTES

In person or virtual. Teachers bring one lesson they teach next week.

- **How AI works and where it fails,** the same way students learn it
- **Running RAILE Chat and RAILE Learn:** rosters, login codes, dashboard, chat summaries, alerts and homework mode
- **Use cases for every subject,** with an AI activity planned for next week
- **AI-use levels** for each assignment
- **Safety in the room** and the first-hour response when something goes wrong
- **Their own use:** keeping student data out of AI tools, and why AI detectors fail
- **Ready for class:** the four lessons and how to give the evals

Classroom curriculum

4 × 45 MINUTES

One lesson a week. One device per student. Teachers lead each lesson with our slides, script and worksheet.

WEEK 1 — **What comes next?** PRE-EVAL
How AI works: a chatbot predicts the next word, one word at a time. Plus the three rules.

WEEK 2 — **How AI goes wrong**
Confident wrong answers, and how to catch and check them.

WEEK 3 — **How to get what you want**
Clear prompts, and how to change them to get a better answer.

WEEK 4 — **When to use AI** POST-EVAL
Help versus cheating, and speaking up when something feels off.

WHAT YOUR SCHOOL GETS

RAILE Chat for every student
A safe place to practice, with a teacher dashboard, chat summaries and real-time alerts.

RAILE Learn for every student
A game that builds AI skills alongside the lessons.

Four lessons, ready to teach
Slides, scripts, worksheets and a teacher quick reference.

A letter home
Ready to send, so families know what their child is learning and how we protect their data.

A results report
Before and after results for each class and the whole school.

Someone to ask
Email us any question, any time.

What we need from you

- Student rosters, so we can set up Chat and Learn accounts
- One device per student for each lesson
- Dates for the teacher session and the four lessons
- The letter sent home before the first lesson

Schedule a planning call.
