TEACHER PROFESSIONAL DEVELOPMENT

ONSITE OR VIRTUAL

joinraile.ai

Get your teachers AI-ready.

Your students are already using AI. Many teachers haven't been trained to guide them, catch AI's mistakes, or respond when something goes wrong. **We fix that with hands-on PD built for real classrooms.**

WHAT TEACHERS LEAVE WITH

Understand AI
How it works, why it fails, and how to check it.

Save time
Planning, differentiation, and feedback, done safely.

Teach with AI
Classroom activities and assessments built for an AI world.

Keep kids safe
Spot the risks and respond to incidents with confidence.

EIGHT MODULES, ALL HANDS-ON

01 How AI Works and Where It Fails
Why AI sounds confident when it's wrong, and the habit of checking it.

02 AI for Your Own Workload
Planning, differentiation, and feedback, without exposing student data.

03 AI in the Classroom
Grade-band guidance from K–2 to 9–12, with activities by subject.

04 Academic Integrity and Assessment
Why detectors fail, and assignments that make student thinking visible.

05 Student Safety and Wellbeing
Companion chatbots, deepfakes, and what to do in the first hour.

06 Privacy, Policy, and Reporting
FERPA, COPPA, and CIPA basics, tool vetting, and mandated reporting.

07 Talking With Families
Explaining your AI policy and handling concerns from every direction.

08 Staying Current
A quick way to evaluate new tools as they arrive.

"Our kids *need* to be taught how to use AI. They are using it without guidance."

Mrs. Geesey, MS Reading & ELA, Ss. Colman-John Neumann

RAILE

TEACHER PROFESSIONAL DEVELOPMENT

A format for every schedule.

Every live format runs onsite or virtually. Getting started takes three steps.

1 **Choose a format.**
Live, self-paced, or blended.

2 **We plan it with you.**
Dates, goals, and delivery.

3 **Teachers leave ready.**
With materials they use the next day.

Essentials — 1 HOUR

The core of all eight modules, sized for a faculty meeting or a kickoff.

Hands-on: Break the Bot and a small-group safety scenario.

Foundations — 2 HOURS

AI for teachers' own work plus classroom basics. Also runs as two 1-hour sessions.

Hands-on: Differentiate a real lesson; work through two safety scenarios.

Applied — HALF DAY

Modules 1 through 6 with full activities, for an in-service morning or afternoon.

Hands-on: Leave with a new classroom activity and a redesigned assignment.

Complete Program — FULL DAY

All eight modules, including family communication and staying current.

Hands-on: An activity in every module, from vetting a tool to drafting a parent letter.

Self-Paced and Blended

Self-paced modules teachers complete on their own time, or blended with live sessions for hands-on practice.

Take-home materials in every format: prompt templates, a grade-band guide, assignment AI-use levels, a tool vetting checklist, a first-hour response guide, and a parent letter template.

We get it. AI moved faster than anyone planned for, and teachers were left to catch up. Led by a parent and award-winning Villanova data science educator, we help teachers use AI with confidence, teach students to question it, and know exactly what to do when it matters.
